*Technologies*

Global  
Outsourcing  
Partner

Supply Chain, Engineering & Marketing

## ▶ Your Trusted Outsourcing Partner

DECON Technologies is a trusted manufacturing and engineering service provider with a hard-earned reputation for quality, services and complete customer satisfaction. Strategically located in Central Gujarat, India.

DECON Technologies provide advanced functionality, purpose-built for your industry. DECON Technologies has proven expertise in supporting efforts to deliver profitable growth in an industry that requires ever increasing levels of technical specialization with support from a complex web of supply-chain partners, based on the latest advances from both the consumer and enterprise worlds.

## ▶ About us...

DECON Technologies is a ISO 9001 2015 certified Global Outsourcing Partners with state of the art in house manufacturing facility utilizing precision machinery and equipment for production and inspection, manned by young dedicated and highly skilled team.

DECON Technologies supply Variety of high precision critical components for various sector like Oil & Gas, Power, Chemical & Process Industry which are custom-made to exact specification and expectations of our Customers.

## ▶ Our Purpose

Decon technologies aims to develop strong and long-term partnerships with clients and vendors by ensuring the highest standards of quality in manufacturing, engineering and other services. We endeavour to develop the most efficient procedures for our manufacturing processes in order to keep costs low and quality high.

## ▶ Our Commitment

Support our customers with technology-driven, cost-effective, quality-compliant, manufacturing solutions, on time.

## ▶ Industries we serve

Power	Petrochemical	Water
Oil & Gas	Chemical	Pharmaceutical
Refining	Fertilizer	General Industrial

"DECON Technologies provides unique capabilities, meets exact specifications, and performs with reliable precision providing optimal product configurations that meet your specific needs, and fall within the scope of your production capabilities. Being able to effectively manage the vast quantity and variety of components and configurations helps manufacturers like you to deliver high-quality products on time meeting market demand"

"SUPPLY HEAD DIRECTOR  
MAJOR OIL & GAS OEM"

## ► What We Do

### 1) Manufacturing

-Investment Casting, Sand Casting, Pressure Die Casting, Centrifugal Casting (Carbon Steel, Low Alloy Steel, Stainless Steel, Duplex Stainless Steel, Nickel & cobalt based alloys, Aluminium Alloys)

-Forging Components (Non-Alloy Steel, Alloy Steel, Stainless, Steel, High Chrome Steel)

-High Precision Machined Components

-Fabricated Parts

-Special Plate components

-Rubber & Moulded Parts

### 2) Engineering Services (Product Development, Process Improvement, Sub Assembly)

### 3) Global Sourcing - Supply Chain, Engineering & Marketing

## ► SERVICES

### CNC Manufacturing

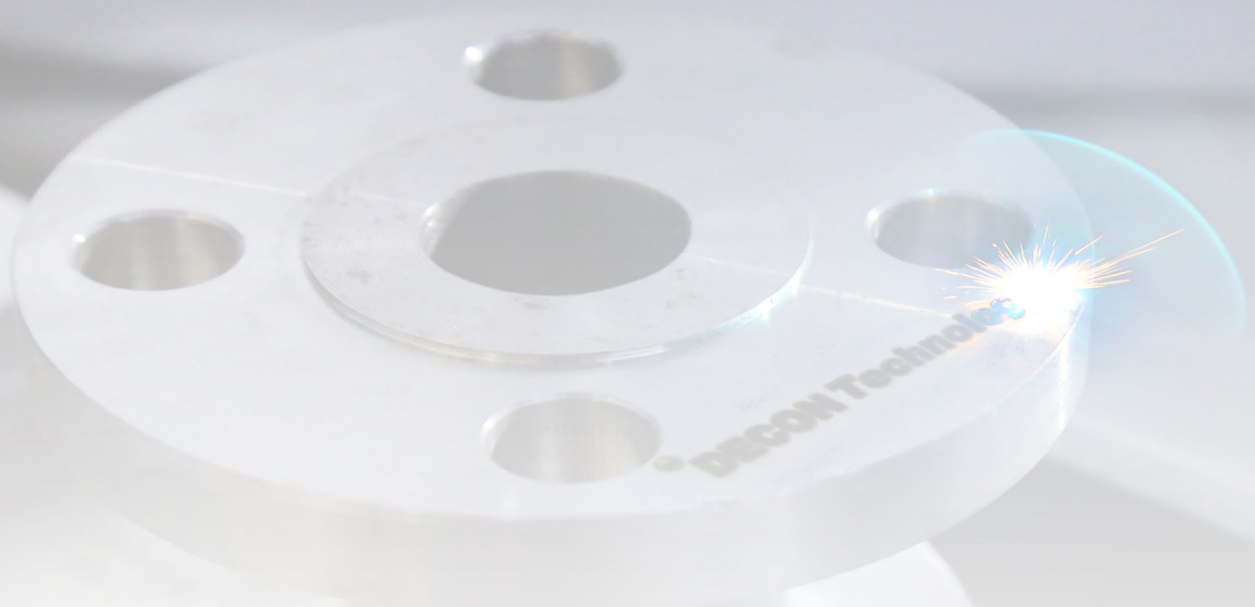

#### World-Class CNC Machining Capabilities

CNC Manufacturing offers machining services with consistent high quality results for large components including CNC milling and turning services for the Power, Oil & Gas, chemical, heavy construction, hydroelectric and General industries. Whether your project is a prototype or production run, small to large size or quantity, we have the skills and expertise to cater to your requirements with speed and efficiency .

### Capabilities

- AutoCAD/Cadcam
- Small and large CNC machining capabilities
- Drilling Machine
- 4 Axis Vertical Milling Center
- Digital Instruments - 2D Height Master
- Hydro Test Bench
- Laser Marking Machine
- Other Inspection Tools
